FORME TEC CORRUGATED LTD

Anvil Cover Operator Checklist

Use before a technical review or service conversation.

CHECK	DETAILS TO CAPTURE
■	Machine make / model and cylinder position
■	Cover part number / current specification
■	Cover fit: loose, correct, tight or inconsistent
■	Installation / removal method currently used
■	Last rotation date and rotation frequency
■	Grinding method, grit, cut and frequency
■	Visible wear, damage, heat or contamination
■	Recent machine changes, repairs or setting changes
■	Production symptom and when it occurs
■	Photos available: cover, cylinder, fitment and working surface

Use this checklist as a conversation starter. Product specifications and machine settings should be confirmed for the specific application.
