FORME TEC CORRUGATED LTD

Corrugator Belt Selection Checklist

Record the machine and application details that help narrow belt construction.

CHECK	DETAILS TO CAPTURE
■	Corrugator make / model
■	Single facer or double backer application
■	Belt position and machine section
■	Belt dimensions and joint details
■	Current belt construction / supplier
■	Board grades and flute mix
■	Typical production speed / operating conditions
■	Known belt wear, tracking, marking or moisture issues
■	Installation history and current tensioning practice
■	Target outcome: life, stability, board quality, tracking or another requirement

Use this checklist as a conversation starter. Product specifications and machine settings should be confirmed for the specific application.
